

BIOGRAPHY

Ms. Sandra Wagner
Deputy Lead, Architecture, Habitation and Integration
NASA JSC

Biography:

Mrs. Wagner is responsible for leading teams performing systems engineering and integrated testing for technology development for exploration systems. Her accomplishments include leading the Mars Human Precursor Science Steering Group Dust, Soil and Toxicology Focus Team, sponsoring the Advanced Extracurricular Activity Dust Focus Group, and leading the Advanced Integration Matrix Dust Assessment.

Prior to this position, Mrs. Wagner was the JSC Orbital Space Plane Project Office Risk Manager and the safety representative for the Joint Software Review Board. Prior to her employment at JSC, she was the Project Manager for the Computerized Maintenance Management System at Langley Research Center, owner of Sanday Services Software Solutions, and managed numerous projects at the Rocky Flats Nuclear Weapons Plant.

Mrs. Wagner holds a Bachelor's degree in Physics from the University of Colorado and a Master of Environmental Policy and Management from the University of Denver.
